

AB66 INTERCOM

AB66 Intercom from Jatronic gives you full compatibility with all standard radio and accessory brands:

Peltor bluetooth headset with full intercom compatibility

PTT adapters (for talkback functionality on the radio communication system)

Integrate as many radios as you like.

Foot PTT for handsfree operation of the radios

Mobile Phone Integration

AB66 Intercom from Jatronic is a cost efficient solution for small to medium sized vessels requiring intercom and radio communication. AB66 is an open intercom between operators that independently operate communication radios, such as TETRA, UHF og VHF (TX og RX).

AB66 Intercom can be configured according to customer specifications.
